DEA (AM 3012)

Dea is an Amaranth with dark red oval leaves. It has a vigorous growth and is fast maturing. The taste is mild and pleasant. Healthy in the field.

RED GARNET

Fast growing. Variety with wine red color leaves. Ideal for the production of micro greens.

SSC3099

Uniform product. Leaves of intense red color. Ideal for the production of micro greens.

RUBENS (BB 207)

Red beet of Bulls Blood type. Very dark red. Will stay red also in warm summer conditions. Uniform variety. Later maturing than other Bulls Blood types.

DIGNUS (BB 214)

Red Beet of Bulls Blood type. Dark red leaves that are slightly savoyed. Faster maturity than BB 207. Uniform selection.

Experience the Leafy choice

Close to the rapid evolution of the market, Vilmorin-Mikado offers a full range of high quality Leafy seeds. Its dedicated teams develop innovations adapted to the entire industry.

General information (prior to reading the catalogue, please consult this section first).

This catalog has been produced for professionals. The photos, descriptions and recommendations given in our catalogs and documents are for information purposes only and may not, under any circumstances, be considered to form part of a contract or a guarantee on produce. The results obtained by our customers depend on a large number of conditions. Besides the variety and quality of the seed, such results are also conditional on factors that are difficult or impossible to assess or predict. Results may vary especially from region to region due to the environment, farming and weather conditions, changes in technical knowledge as well as cultivation techniques and operations. Genetic resistances do not preclude the necessary use of supplemental preventive or phytosanitary measures. Any complete or partial reproduction of this publication by any means (print, photocopy, microfilm or other) is strictly forbidden without the prior written consent of the publisher.

BB 217

Red beet of Bulls Blood type. Very dark red. Will stay red also in warm summer conditions. Uniform variety. Later maturing than other Bulls Blood types. Slightly more wavy leaf than Rubens and slightly darker red.

BB 218 **SAMPLE ONLY**

New Bulls blood with very nice red color, uniformity and good vigor. Resistance to Pseudomonas syringae.

BULL'S BLOOD

Thick texture. Leaves of narrow oval shapes. Very nice dark red color.

DETROIT DARK RED

Vigorous variety. Variety particularly resistant to cold in winter. Bright green color and dark red veins. Attractive product.

RUBY RED

Smooth leaves. Product with dark green leaves with intense red veins and petioles. Industry standard.

GRS GRAINE

Medium late broad leaf type. Dark green with serrated leaf shape. Upright growth shape. Vigorous and high yielding selection.

VERTE DE CAMBRAI

Medium dark to dark green leaves. Upright growth habit. Late bolting.

EBONY (AD 4832)

Very dark red and round leaves. Keeps the red also in hot periods.

RUS (AD 4835)

Kale with red veins. When grown for large plants the leaves will turn completely red during colder weather in the autumn.

DWARF GREEN CURLED SCOTCH

Baby kale with oval shape and irregular scalloped margins. Medium green color. The variety is suitable in winter slot with cold conditions.

**AMARA (SSC 3125)**

Vigorous growing. Produced with a good texture and a sweet taste with a hint of garlic. Dark green color. Scalloped margins.

UPLAND CRESS

Sweet taste. Variety adapted to cold weather. Small dark oval leaves. Fines stems.

**CARLSBAD**

Carlsbad was derived from germplasm with crisp and extra thick texture. It is highly Bremia resistant and is ideal for baby leaf salads. It produces deep green colored leaves with excellent texture and serrated margins. Very upright growth. BI:1-8US / BI:16-20,22-25,27,28,30-32EU
U.S. Protected Variety / U.S. Patent No. 8,809,632

**DAREDEVIL**

A red leaf lettuce with remarkably thick texture. Dark wine-red leaves. Scalloped/serrated margins

**RUBRA (OR 3401)**

Orach belongs to the same family as Amaranth and Spinach. OR 3401 is a fast growing variety with a red leaf. The leaf is thick with a good texture for raw salads. Fine taste.

GIMLET

Gimlet is a red leaf lettuce selected for baby leaf salads. It produces glossy, wine-red leaves with wavy leaf margins and good texture. The leaves have a narrow stem which makes for a small cut surface. BI:1-8US / BI:16-26,28,32EU
U.S. Protected Variety / U.S. Patent No. 9,655,339

**ASILOMAR**

Mild and not bitter flavor. Nice oakleaf with a good texture. Very nice color. Good shape. HR: Bremia BI:16-33,35EU. IR: FOL1

**WINGMAN**

Good yield. Dark green and thick leaves. Good shelf life. Green color and fresh. HR: Bremia BI:16-33,35EU

**BB 10693**

Baby Green Lettuce. Batavia type with dark bright green color. Thick and curly leaves. Good vigor. HR: BI:16-36EU / Nr:0

MOJITO

Nice shape. Variety with thick texture. Green dark color. HR: Bremia BI:16-26,28,31,32EU

SHOWDOWN

Thick texture. Product with dark red leaves. Serrated margins.
HR: Bremia BI:16-33,35EU
