

RHAPSODY

Lettuce Butter

Superior tip burn tolerance

PVP 200000335

CHARACTERISTICS

Resistance

HR : Downy mildew (BI) : BI:1-6US/BI:17,19,21,23EU ; Lettuce mosaic (LMV:1) ;

Glossy leaf

Smooth margins

Ideal for processing

DESCRIPTION

A very attractive and high yielding butter lettuce.

Produces large, heavy heads that make it especially suited for the prepared salad markets.

It's leaves are glossy and dark with smooth margins.

The leaf texture is moderately thick and mildly blistered.

Rhapsody has superior tipburn tolerance compared to other varieties in its class.

Vilmorin is a brand of the Business Unit Vilmorin-Mikado. The genetic resistances are not dispensed from prophylactic measures to be used as an addition. Our recommendations, suggestions, growing cycles and maturity information are only indicative and based on our own observations and our general experience. They are not contractual and they do not necessarily imply a successful harvest and/or result. The success of the cultivation also depends on factors non-related with the seed.
