

YOSEMITE F1

Carrot imperator cello jumbo

Smooth Root Quality

CHARACTERISTICS

Smooth root quality
Great deep orange color inside and out
Strong leaf attachment

DESCRIPTION

Foliage: Strong tops and good attachment making easier harvest by top lifting

Root:

Long and slightly tapered shape

Average length: 10" (25-26 cm)

Average diameter: 1" - 1 1/2" (2.5-4 cm)

Good quality, smooth, excellent color, deep orange, external and internal, small core

The root size (length and diameter) depends on the sowing population

Maturity: Medium late, maturity 130 days after sowing

Sowing/Planting: April - May

Harvest: August - September

Vilmorin is a brand of the Business Unit Vilmorin-Mikado. The genetic resistances are not dispensed from prophylactic measures to be used as an addition. Our recommendations, suggestions, growing cycles and maturity information are only indicative and based on our own observations and our general experience. They are not contractual and they do not necessarily imply a successful harvest and/or result. The success of the cultivation also depends on factors non-related with the seed.
